

Hide Glue Collagen

For wooden joints in the instruments

Description

Hide Glue Collagen is a non-toxic, natural and readily biodegradable product. Among its uses are wooden instrument making and restoration. It is an easy-to-use, effective product that can be easily applied and reversed if needed by applying heat.

Composition

- 84-90% protein
- 8-12% water
- 2-4% mineral salts

It contains no fat or carbohydrates, no purine or cholesterol and is free of preservatives.

Properties

It consists of low-odour grains, soluble in water, non-flammable, and biodegradable.

The product is granulated and dehydrated, so the first step would be to hydrate it with water and let it rest for a few hours.

Application

Mix the product with warm water once the grains are fully hydrated until you achieve a uniform mixture. Be cautious, as the glue can burn at high temperatures.

Storage

Store it tightly closed and cool, and do not expose it to direct light or outdoor elements. Avoid heat, radiation, and static electricity. Under these conditions, the **Hide Glue Collagen** has been stable for over two years.

Security

According to Regulation No 1272/2008 (CLP), this product is not a hazardous substance or mixture for health or the environment. The material is readily biodegradable.

Protective gloves against minor hazards and panoramic goggles against splashes and/or projections are recommended to prevent eye or skin contact.
